Oracle

SQL Server

Summary

Highly experienced (7+ years) Angular expert with a strong background in object-oriented design, UI/UX development, and enterprise application development. Proven track record of delivering scalable, business-critical solutions in the BFSI sector, with expertise in performance optimization, testing, and Agile methodologies.

Work Experience

IT Analyst, Tata consultancy Services , Trivandrum

december 2021 - Nuvarande

Delivered high-impact solutions for prominent BFSI clients, including CRH Americas Materials, Inc. and CITI. Utilized Angular, JavaScript, Java, Oracle, and jQuery to develop and enhance critical business applications.

Key Highlights:

- CMMS REWRITE: Ensured seamless maintenance activity tracking and management for construction equipment across multiple sites
- Dynamic Pricing: Developed a Rule Engine to create customized offers for customers, consumed by mobile and web applications via API
- Private Banking - Insurance: Built an application for booking insurance, utilizing Angular, Java, Oracle, and JavaScript
- Technical expertise: Angular, JavaScript, Java, Oracle, jQuery, VS Code with Copilot, and Jest for unit testing
- Achievements: Successfully migrated legacy applications from jQuery to Angular 14, created common UI libraries as npm packages, and implemented micro-frontend architecture using module federation

Product Engineer - Front End, Gridstone Technologies , Cyber Park, Calicut

september 2021 - november 2021

Secure signup page and dashboard with interceptor and authentication services

Unit test cases to ensure high-quality code

Enhanced module functionalities to meet specifications

Defect fixing to ensure seamless application performance

Angular Developer, Manappuram Comptech & Consultants Limited, Thrissur

juni 2019 - september 2021

Loan Management System Expertise

Designed, developed, and deployed multiple Loan Management Systems (LMS) and Loan Origination Systems (LOS) for prominent finance companies, including Manappuram Finance Limited and Asirvad Microfinance Ltd. Utilized Angular Framework to create scalable, efficient, and user-friendly solutions.

Key Highlights:

- Developed end-to-end loan management solutions, covering loan origination, credit checks, verification, approval, and post-disbursement activities
- Integrated external APIs, such as CIBIL, AADHAAR, and E-NACH, for credit checks, verification, and payment processing
- Created dynamic templates, including customer creation, document upload, and loan application templates using Angular
- Collaborated with clients to understand functional requirements and delivered tailored solutions
- Ensured seamless deployment, testing, and maintenance of applications, with ongoing support for defect fixing and enhancement

Software Engineer, GJ Infotech, Thrissur

maj 2018 - maj 2019

Designed and developed Windows Forms applications to enhance business operations and user experience. Created interactive and dynamic RDLC reports to provide insightful data analysis and visualization, enabling informed decision-making.

Education

Diploma in Computer Engineering, St.Mary's Ploytechnic College (7.9 CGPA)

juli 2015 - november 2018
